

## In-line Ecoline™ system Option 1

*Chlorinating large water volume*

Chemical reaction turns small quantity of natural, mineral salts that occur in the fresh water into Sodium Hypochlorite

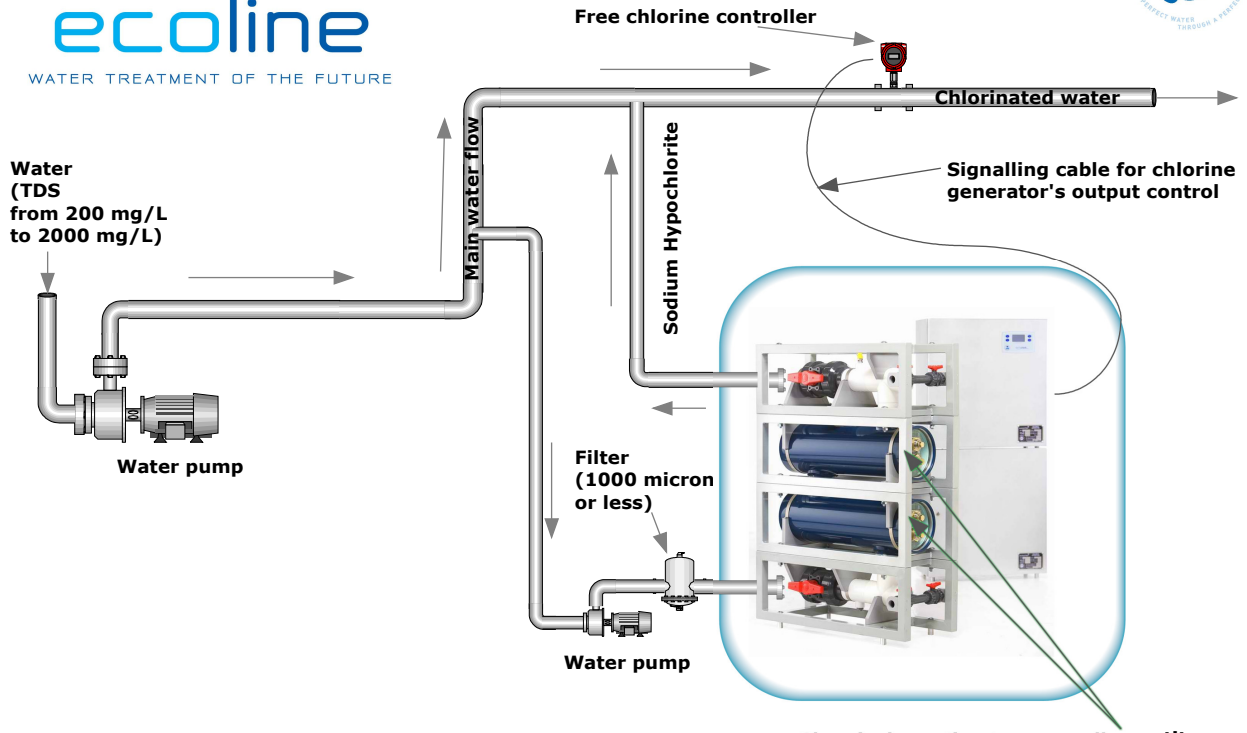

## In-line Ecoline™ system Option 2

*Chlorinating large water volume*

Chemical reaction turns small quantity of natural, mineral salts that occur in the fresh water into Sodium Hypochlorite

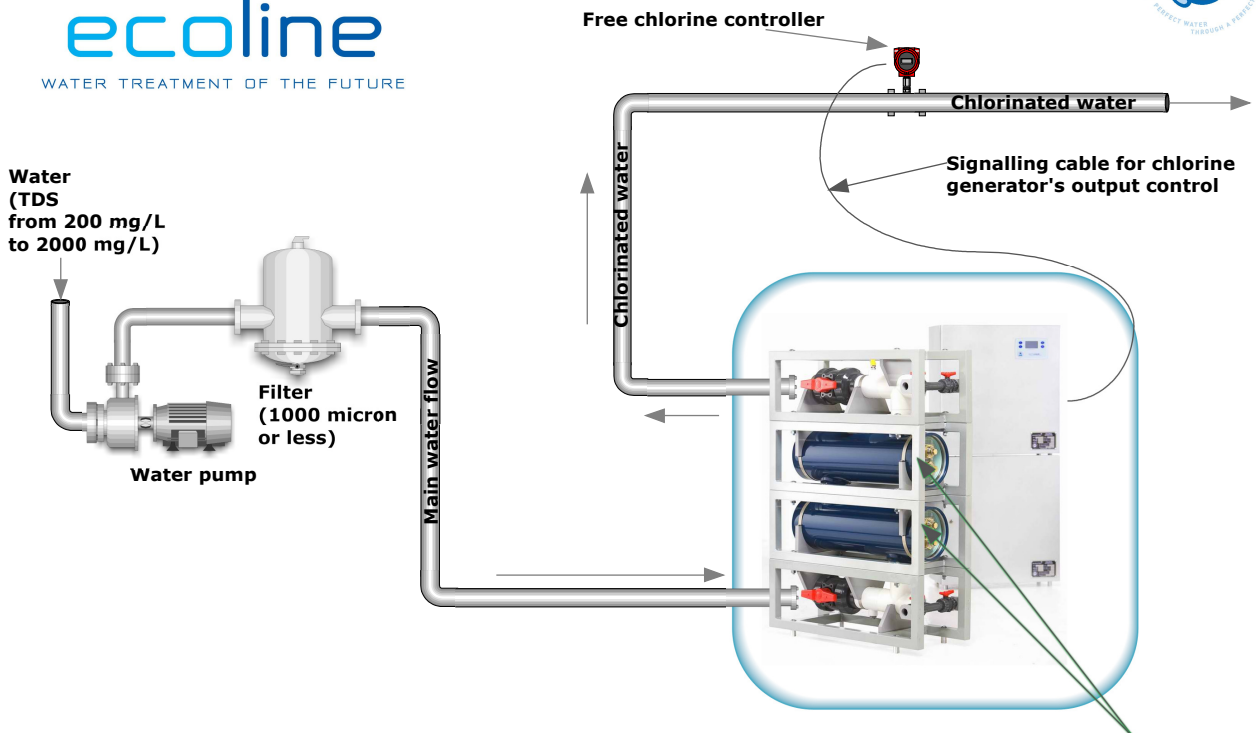

### In-line Ecoline™ system Option 3

*Chlorinating large water volume*

Chemical reaction turns small quantity of natural, mineral salts that occur in the fresh water into Sodium Hypochlorite

### In-line Ecoline™ system Option 4

*Chlorinating small water volume*

Chemical reaction turns small quantity of natural, mineral salts that occur in the fresh water into Sodium Hypochlorite
